Features

Features

1. User Account Management Module

Registration & Login

- The system provides a **unified registration and login process** with **no role selection**.
- Users are required to input:
  - Full Name
  - Email Address
  - Password
- After registration, users proceed to a **verification page**, where account details are subject to **admin review and approval**.
- All registered users are assigned a default role as **Standard User (Buyer)**.
- Secure authentication mechanisms are implemented, including login validation and account protection (register, login, forgot password, logout)

Artist Application & Verification

- Users who wish to become artists can apply through a **"Become an Artist" feature** within their account.
- Applicants are required to submit:
  - Artist profile information (bio, art style, medium, etc.)
  - Sample artworks for evaluation
- Submitted applications are reviewed by the **admin for verification**.

Approval & Portfolio Integration

- Once approved:
  - The user is granted a **"Verified Artist" badge**
  - Submitted artist details are published to their profile
  - Uploaded sample artworks are **automatically displayed in the artist's portfolio**
- This ensures a seamless transition from applicant to active artist without requiring re-upload of artworks.

Student (Scholar Tier) Verification

- Users may apply for **Scholar Tier benefits** by uploading a valid **School ID**.
- Admin verification is required to activate scholar privileges.

Profile & Account Management

- Users can manage their personal account information.
- Verified artists gain access to:
  - A **professional portfolio profile**

    - Artistic identity customization (bio, styles, showcased works)

2. Marketplace & Portfolio Module (Artist)

- Product listing tool for original artworks and handmade creative products.
- Fair and competitive pricing guidance tool to help new artists value their work.
- Portfolio builder to showcase work and gain professional recognition.
- Inventory management for ready-to-buy pieces.
- Performance analytics dashboard to track profile visibility and exposure.

3. Commission & Custom Request Module

- Direct artist-buyer messaging system for discussing project details.
- Commission request interface for clients to order custom pieces.
- Workflow tracking to manage custom projects from sketch to final delivery.
- Secure file sharing for sending drafts and final high-resolution artwork.

4. Discovery & Bidding Module (Buyer)

- Centralized marketplace search to discover local Bukidnon artists and authentic artworks.
- Real-time bidding and auction system for high-demand or unique pieces.
- Personalized recommendation engine for "Featured Artists" and trending local art.
- Categorized browsing by style, medium, and artist type (Traditional or Digital).

5. Secure Transaction & Payment Module (simulation)

- Trusted escrow system to hold payments until artwork is received.
- Integrated payment gateway supporting GCash, Maya, and local bank transfers.
- Automated commission deduction and payout system for artists.
- Financial records and sales history for income tracking and stability.

db schema

Database Schema (Firebase Firestore)

- `users` **(Collection)**
  - `uid`: (String) Unique ID from Firebase Auth
  - `role`: "artist" | "buyer"
  - `isVerified`: (Boolean) For the artist verification badge
  - `isStudent`: (Boolean) For Scholar tier benefits
  - `portfolio`: (Sub-collection) For artist's uploaded works
- `artworks` **(Collection)**
  - `artId`: (String)
  - `artistId`: (Reference to users)
  - `title`, `description`, `price`: (Number)
  - `imageUrl`: (String) Link to Firebase Storage
  - `type`: "ready-to-buy" | "bidding"
  - `isBiddingActive`: (Boolean)
- `bids` **(Collection)**
  - `artId`: (Reference to artworks)
  - `currentHighestBid`: (Number)
  - `bidderId`: (Reference to users)
  - `expiryTime`: (Timestamp)
- `commissions` **(Collection)**
  - `clientId`: (Reference to users)
  - `artistId`: (Reference to users)
  - `status`: "pending" | "in-progress" | "completed"
  - `price`: (Number)

screens

1. Unified Authentication & Onboarding Module

- ☐ **Splash Screen:** Initial loading screen that checks if a user is already logged in (using Firebase Auth state).
- ☐ **Login Screen:** Simple interface with Email and Password fields.
- ☐ **Registration Screen:** Includes a **one-time role selection** (Artist or Buyer) and basic info. (It is not necessary nga during login or sign up kay naa need pa mag pili sa user artist ba sya or buyer, just login or sign up) - upon sign up, naa nay verification especially for artists
- ☐ **Role-Specific Onboarding:**
    - *Artist:* A screen to upload a bio and verify identity/student status.
    - *Buyer:* A screen to select art interests (e.g., Traditional, Digital, Sculptures).

2. Buyer Module (The Marketplace)

If the `AuthViewModel` detects the role as "Buyer," it navigates here.

- ☐ **Marketplace Home Screen:** A discovery feed featuring "Featured Bukidnon Artists" and trending works.
    - *Widget:* `SliverAppBar` for a clean look and `MasonryGridView` for the art feed.
- ☐ **Art Detail Screen:** High-resolution view of a specific piece with price and artist info.
- ☐ **Bidding/Auction Screen:** Real-time interface for active auctions with a live countdown and bid history.
- ☐ **Search & Filter Screen:** Dedicated search for specific styles, price ranges, or local Bukidnon regions.
- ☐ **Buyer Order History:** Tracks pending commissions and purchased artworks.

---

3. Artist Module (The Dashboard)

Access Control

- The system automatically grants access to the **Artist Module** once a user is **approved as a Verified Artist**.
- No manual role selection is required.
- Upon login, verified artists are redirected to the **Artist Dashboard** as their primary interface.

Artist Dashboard (Main Landing Page)

- Serves as the central hub for managing all artist activities.

Dashboard Overview Includes:

- **Total Earnings**:
  - Displays net income after platform deductions (e.g., service fees)
- **Active Projects**:
  - Ongoing commissions and pending orders
- **Artwork Performance Summary**:
  - Views, likes, and engagement metrics
- **Quick Actions**:
  - Upload Artwork
  - View Portfolio
  - Manage Commissions

My Portfolio Management

- Displays a **grid layout** of all uploaded artworks.
- Artists can:
  - View, edit, or delete listings
  - Update availability (For Sale / For Bidding / Reserved / Sold)
- Automatically includes:
  - Artworks submitted during verification (no re-upload needed)

Upload Artwork Module

- A **multi-step form interface** for adding new artworks.

Key Features:

- Upload images using **Image Picker**
- Input fields for:
  - Title
  - Description
  - Medium / Style
  - Size / Dimensions
- Selection options:

    - Set as **For Sale** or **For Bidding**

Integrated Pricing Guidance Tool

- Built directly into the upload process to assist artists in pricing their work.

Capabilities:

- Suggests price range based on:
    - Time spent
    - Materials used
    - Complexity and demand
- Provides:
    - Market comparison (similar artworks)
    - Pricing feedback (e.g., underpriced, competitive, premium)
- Displays **estimated net earnings after platform fees**

Commission Manager

- A dedicated interface for handling custom artwork requests.

Features:

- List view of incoming commission requests
- Options to:
    - Accept or reject requests
    - Update project status (e.g., Sketch, In Progress, Completed)
- Communication support with buyers for clarifications
- Progress tracking for each commission

---

4. Communication & Transaction Module

Inbox / Chat List

Displays a list of all active conversations between users.

Features:

- Conversation previews (last message, timestamp)
- Participant identification (Buyer or Artist)
- Status indicators:
    - Ongoing commission
    - Completed transaction
- Search and filter options for easier navigation

Chat Room (Messaging Interface)

Enables direct communication between buyers and artists.

Capabilities:

- Real-time messaging
- Sharing of:
    - Images (drafts, references, final artwork)
    - Files (high-resolution outputs)
- Message notifications and read receipts

Used for discussing:

- Artwork details
- Pricing agreements
- Revisions and updates

Checkout & Payment Screen (Buyer Side – Simulated)

Used by buyers to confirm purchases or commission agreements.

Features:

- Order summary:
    - Artwork details or commission description
    - Final agreed price
- **Simulated payment method selection:**
    - GCash (simulation)
    - Maya (simulation)
    - Bank transfer (simulation)

Transaction Logic (Simulation Only):

- Initiates a **simulated escrow system**

- Payment is recorded as “held” within the system (no real transfer)
- Funds are marked as “released” only after buyer confirms delivery

Displays:

- Total cost
- Simulated platform fees

Escrow & Order Tracking System (Simulated)

Ensures fair and transparent transactions within the system.

Workflow:

1. Buyer confirms payment → system marks funds as “held”
2. Artist completes and delivers artwork
3. Buyer confirms receipt
4. System updates status to “payment released”

Additional Features:

- Order status tracking:
    - Pending
    - In Progress
    - Delivered
    - Completed
- Dispute handling mechanism (status-based resolution only, no real refunds)

Wallet & Payout System (Artist Only – Simulated)

Allows verified artists to track their earnings within the platform.

Features:

- Available balance display (simulated)
- Earnings breakdown:
    - Gross sales
    - Platform deductions
    - Net income
- **Simulated withdrawal options:**
    - GCash
    - Bank transfer

- Transaction history:
    - Completed payouts (simulated)
    - Pending balances

---

5. Settings & Profile Module

User Profile & Portfolio Interface

- The system provides a **comprehensive user profile interface** designed similarly to modern social platforms (e.g., Facebook) for familiarity and ease of use.

Profile Layout Structure

- **Cover Photo Section** (top banner)
- **Profile Picture** (circular display)
- **User Information Area**:
    - Full Name
    - Pen Name / Username
    - Verified Artist Badge (if applicable)
    - Short Bio / Artist Description
- **Profile Controls**:
    - “Edit Profile” button for updating personal details
- **User Statistics Display**:
    - Number of artworks uploaded
    - Total sales
    - Ratings and reviews

Portfolio Section (For Artists)

- A dedicated **portfolio area** is available for verified artists.

Portfolio Navigation Tabs

- **Artworks Tab**:
    - Displays all uploaded artworks
- **Commissions Tab**:
    - Shows commission offerings or completed works

Empty State Handling

- If no artworks are available:
    - The system displays an **“Upload New Artwork”** prompt/button
    - Encourages artists to start building their portfolio

Account Settings

- Users can manage personal preferences and system settings, including:
    - Privacy controls
    - Notification preferences (messages, orders, bids, etc.)

Navigation Drawer (Sidebar Menu)

- The system includes a **drawer-style navigation panel** for easy access to all user functionalities.

Drawer Contents

- Profile
- Orders
- Commissions
- Portfolio (for artists)
- Messages
- Settings
- Logout

USER Flow

USER Flow

Artist
Login/Signup → Onboarding → Dashboard → (Portfolio / Upload / Commissions / Chat / Wallet) → Deliver Artwork → Get Paid

Buyer
Login/Signup → Onboarding → Marketplace → Browse/Search → Art Detail → Buy/Bid → Chat → Checkout → Track Order → Confirm Delivery

Admin
Login → Dashboard → (Verify Artists / Manage Users / Moderate Content / Handle Disputes / Monitor Transactions / View Analytics)

MODULES

🔐 1. ADMIN MODULE (Platform Control Panel)

This is not visible to normal users. It's for managing the whole ecosystem.

🧭 Admin Dashboard

Main overview of the platform:

- Total users (Buyers vs Artists)
- Verified artists count
- Total transactions (simulated)
- Active auctions
- Revenue analytics (platform fees)

👤 User Management

Admin controls all accounts.

Features:

- View all users
- Filter:
  - Buyers
  - Artists (Verified / Pending)
- Actions:
  - Approve / Reject artist verification
  - Suspend / Ban users
  - View user details & activity logs

🎨 Artist Verification Management

Critical feature based on your system.

Workflow:

- Artist submits:
  - Bio
  - Portfolio samples
  - Student/identity verification
- Admin can:
  - Approve → becomes **Verified Artist**
  - Reject → send feedback

🖼️ Artwork Moderation

Ensure marketplace quality.

Features:

- View all uploaded artworks
- Flag inappropriate content
- Remove or hide listings
- Review reported artworks

💰 Transaction Monitoring (Simulated)

Even if payments are simulated, admin tracks everything.

Features:

- View all orders
- Check escrow statuses:
  - Held
  - Released
- Monitor disputes
- View commission activities

⚖️ Dispute Management

Handles conflicts.

Features:

- View dispute cases
- Review chat history & order details
- Resolve by:
    - Marking as completed
    - Cancelling order (status-based only)

📊 Reports & Analytics

- Sales trends
- Popular categories (Digital, Traditional, etc.)
- Top-performing artists
- Buyer activity

⚙️ Platform Settings

- Set platform fee %
- Manage categories (styles, regions like Bukidnon)
- Notification controls
- System announcements

🛒 2. BUYER / STANDARD USER MODULE

This is the **default user experience** after login.

🏠 Marketplace (Home)

Discovery feed.

Features:

- Featured Artists (e.g., Bukidnon Artists)
- Trending artworks
- Categories
- Infinite scroll (Masonry Grid)

🔍 Search & Filters

- Search by:
  - Artist name
  - Artwork title
- Filters:
  - Price range
  - Medium/style
  - Location (Bukidnon regions)

🖼️ Artwork Details

- High-resolution image
- Artist profile preview
- Price / Bid info
- Buttons:
  - Buy Now
  - Place Bid
  - Message Artist

🏷️ Bidding / Auction

- Live countdown
- Real-time bids
- Bid history
- Place new bid

💬 Messaging (Chat)

- Talk directly to artists
- Send:
  - References
  - Feedback
  - Files/images

🧾 Orders & Transactions

Tracks all activity.

Status:

- Pending
- In Progress
- Delivered
- Completed

💳 Checkout (Simulated)

- Order summary
- Payment method:
    - GCash
    - Maya
    - Bank
- Escrow simulation:
    - Payment held → released after confirmation

❤️ Favorites / Interests

- Save artworks
- Personalized feed

👤 Profile

- Basic user info
- Order history
- Reviews given

⚙️ Settings

- Notifications
- Privacy
- Account settings

🎨 3. ARTIST MODULE (Verified Users Only)

Accessible ONLY after admin approval.

📊 Artist Dashboard (Main Screen)

Your control center.

Displays:

- Total earnings (net)
- Active commissions
- Artwork performance (views, likes)
- Quick actions:
    - Upload artwork
    - Manage portfolio

🖼️ Portfolio Management

Grid layout of artworks.

Actions:

- Edit / Delete
- Update status:
    - For Sale
    - For Bidding
    - Reserved

    - Sold

⬆️ Upload Artwork

Multi-step form.

Inputs:

- Title
- Description
- Medium/style
- Size
- Images

Options:

- Sell or Auction

💡 Pricing Guidance Tool

Built-in smart helper.

Suggests:

- Price range
- Market comparison
- Profit after fees

🧾 Commission Manager

Handles custom work.

Features:

- Accept / Reject requests
- Update progress:
    - Sketch

    - In Progress
    - Completed
- Chat with buyers

💬 Messaging

Same as buyer, but artist-focused:

- Discuss commissions
- Send drafts & finals

💰 Wallet (Simulated)

- Available balance
- Earnings breakdown:
    - Gross
    - Fees
    - Net

Withdraw (Simulated):

- GCash
- Bank transfer

📦 Order Management

Tracks all sales.

Status:

- Pending
- In Progress
- Delivered
- Completed

👤 Artist Profile

Social-style layout:

- Cover photo
- Profile picture
- Bio
- Verified badge
- Stats:
    - Artworks
    - Sales
    - Ratings

⚙️ Settings

- Notifications
- Portfolio visibility
- Account controls

🔄 SYSTEM FLOW SUMMARY

- User signs up → default = **Buyer**
- If user applies as artist → goes to **Admin Verification**
- Admin approves → user becomes **Verified Artist**
- System redirects:
    - Buyer → Marketplace
    - Artist → Dashboard

  EVEN IF VERIFIED ARTIST NA ANG USER, THEY CAN ASTILL BUY OTHER ARTWOKRS FROM THE MARKETPLACE IF THEY WANT TO
